Who we are

METRICA S.A. is based on the knowledge and technical expertise of its personnel, that has been in the field for more than 20 years. From best-in-class surveying & environmental instruments to the broadest solution portfolio in the measurement world, METRICA S.A. is helping customers to understand, plan and implement solutions for simple, complex or unique applications related to Surveying, Heavy Industry, Shipping and the Environmental sector. We are involved in innovative projects in Greece, Cyprus and worldwide.

Vision

To sustain leadership in the Greek market providing breakthrough high accuracy measurement technologies.

Mission

To provide organizations and industry professionals with innovative, high-end solutions / services, at European standards, that enhance their productivity, increase quality and speed and reduce their operating cost.

OUR ACTIVITY

PRODUCTS & SOLUTIONS

- Architecture, Engineering, Construction
- Metrology / Industrial applications
- Environmental solutions for Hydrology, Meteorology, Oceanography

INDUSTRIAL SERVICES

- 3D Scanning & Modeling
- Air Mapping
- Bathymetry surveys
- Mobile Mapping surveys
- Metrology services / Machine alignment
- Data as Service

RESEARCH & INNOVATION

- R&D projects
- Develop innovative solutions/methodologies
- Implementation projects
- Tailor-made solutions with high-level integration

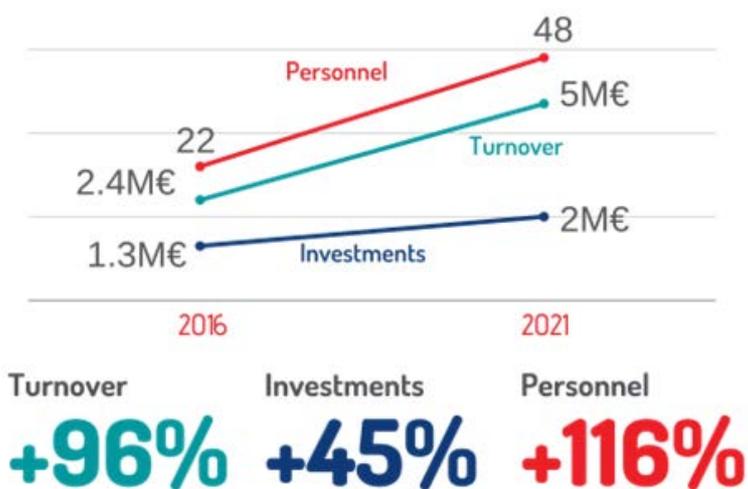

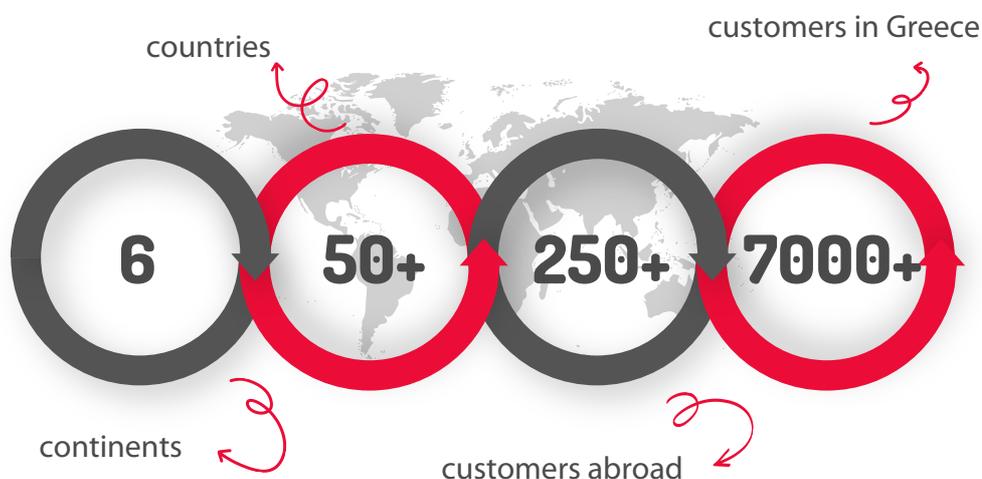

WHY CHOOSE US

RESPONSIBLE, INNOVATIVE & PROFESSIONAL

- We offer / use state-of-the-art equipment
- We offer customized solutions
- Team of experienced & well-trained engineers
- We develop innovations (R.I.C.)
- We offer a comprehensive customer support
- We operate worldwide
- We have an extensive customer list

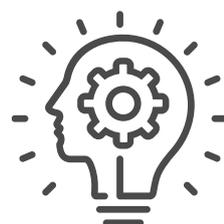

Sustainability & Growth

Research & Innovation Center

METRICA's Research and Innovation Center follows a simple philosophy: to devote our knowledge and technology to create superior services that contribute to safer results. For this reason, from research to services, we continuously strive to improve on all levels to ensure our users can always rely on our team. We mixed our knowledge and technical skills with our creativity and passion. We strive to deeply understand our users and turn their needs and ideas into innovative solutions. For this purpose, our methodology includes

- basic and applied research,
- technology development and integration,
- testing and validation in a real or simulated environment.

Certifications

- ISO 9001:2015 Quality management
- ISO 14001:2015 Environmental management
- Certified SERVICE centre Leica Geosystems
- HxGN SmartNet Certification
